About us

Conceived and grown from personal challenges, Harrogate Organics Company is on a mission to help people live their best life.

We are a sustainability-focused natural health, lifestyle and beauty brand based in Harrogate, England. As an ethically focused company, we are passionate about the power of natural and organic ingredients, using them as the basis for all of our products. Our range of naturally-based skincare, body care, aromatherapy and health supplements are made using natural ingredients, sourced from some of the finest suppliers in the United Kingdom and Europe.

We believe in a single principle; multiple natural-based products working together to help some of the challenges life throws at us. We are all about our customer, they are our primary focus and the reason we exist. Our vision is clear - 'be amazing' wherever we can, and provide some of the best natural-based products available today.

Our customers love us and tell us every day, and the feeling is very much mutual. With thousands of 5-star reviews, Harrogate Organics is fast becoming one of the most respected, up and coming wellness brands in the UK.

We think outside the box, so if it doesn't need one, we don't use one. Yes, we know, you've heard it all before. Sustainability is a bit of a buzzword and 'greenwashing' is rife. However, like us, we know you care about the environment so we do our best to make sure that your purchases are ethically made and considerate of its impact. We're proud of how much thought goes behind

every product, whether its ensuring our shopping bags are unlaminated for easy recycling, to zero-carbon sugarcane based plastics for our bottles.

Let's face it, we human beings have a lot to answer for. But people can also be an amazing force for good in this world. We think it's really simple; make better choices. We make choices each day that may be small one-by-one, but like grains of sand, they all add up.

We stand for sustainable producers, championing eco-friendly small and medium-sized businesses in helping them to grow alongside us. We relish playing our part in society and doing our 'bit'.

We are based in Harrogate, one of the United Kingdom's original spa towns. Harrogate has been renowned as a spa town since the 18th century, is located in North Yorkshire in the north of England and is home to many natural springs. It is well-known for its healing waters and has become a popular destination for tourists.

Warm Regards

Beautifully made and luxuriously packed, our hand care bundle really is a cut above. Rich in naturally nourishing oils and deeply cleansing, our hand and body wash helps to hydrate and revitalise your skin. Infused with Aloe Vera to cleanse, moisturise and help rejuvenate the skin, our hand and body wash also contains zero sulphates (SLS). Many soap products in the market today contain an ingredient called SLS (Sodium Lauryl Sulfate), which is a harsh synthetic foaming agent and detergent that corrodes in order to clean. Our Aloe Vera hand and body lotion leaves skin incredibly moisturised and helps smooth and revitalise skin of every type and age.
